WORKING EXPERIENCE

PT. Securxcess (Group of Lintas Teknologi Indonesia), Jakarta

Jul 2022 – Jun 2025

Security Operation Center (SOC) Analyst

- Conducted in depth incident investigations on escalated alerts using SIEM (Security Information and Event Management), EDR/XDR platforms.
- Performed proactive threat hunting leveraging MITRE ATT&CK framework.
- Led containment and eradication efforts including endpoint isolation, C2 infrastructure blocking, credential resets, and malware removal.
- Fine-tuned SIEM detection rules and correlation searches to minimize false positives and enhance alert fidelity.
- Executed static and dynamic malware analysis using internal/hybrid sandboxes extracted and operationalized Indicators of Compromise (IOCs).
- Built and maintained automated response playbooks, validated high-risk vulnerabilities and developed proof of concept exploits to prioritize and accelerate critical patching initiatives.
- Operationalized threat intelligence feeds into blocklists, detection rules, and enrichment workflows.
- Identify, contain, mitigate, remediate, and report cybersecurity incidents that impact the enterprise and business operations.

PT. ITSEC Asia Tbk, Jakarta

Feb 2020 – Jul 2022

Security Operation Center (SOC) Analyst

- Managed a Continuously monitor alerts and detections on tools with critical and high severity levels for further analysis, and prepare related reports.
- Investigate security breaches and other cybersecurity incidents.
- Notify the internal BRI SOC team about suspicious or malicious threats in SIEM, and validate suspicious events across all devices such as NIPS, Firewall, NIDS, EDR, etc.
- Prepare daily reports for the internal BRI SOC team.
- Notify the BRI SOC team about suspicious or malicious threats in ExtraHop and IronPort.
- Prepare daily reports for the internal SOC team and update playbooks.
- Remediate detected vulnerabilities to maintain high security standards.
- Stay abreast of the latest trends and news in IT security.

PT. Lentice Solution Indonesia, Jakarta

Mar 2019 – Feb 2020

Security Operation Center (SOC) Analyst

- Perform system security monitoring and security analysis using Tenable Security Center, OpManager, BASE, IBM Site Protector, and ArcSight. Daily tasks include monitoring and analyzing data collected at the Operations Center.
- Respond to security alerts.
- Notify the Agency/Local Administrator of serious security threats, if necessary.
- Identify new vulnerabilities from trusted sources and gather information to provide to clients.
- Act as Indosat Service Manager to create incident tickets for activities.
- Conduct HP ArcSight ESM health checks for SIEM and loggers.
- Perform ad-hoc daily Nessus scans for vulnerability assessments and prepare reports for delivery to the Patching team.
- Create or reset accounts in CyberArk for performing activities, and investigate suspicious activities.

PT. Cashwagon Indonesia, Jakarta

May 2018 – Feb 2019

IT Infrastructure

- Responsible for managing and maintaining the organization's IT infrastructure, ensuring optimal system performance, security, and reliability.
- This includes diagnosing and resolving hardware, software, and network issues; monitoring server performance and network health; and overseeing data backup, recovery, and off-site storage.
- The role also involves administering IT asset management, enforcing network and security policies (including firewall and antivirus management), and coordinating escalation and resolution of complex technical incidents.
- Additionally, the IT Lead collaborates across departments to meet operational goals and undertakes ad-hoc projects as assigned by management to support continuous improvement and technology alignment with business objectives.

PT. Gading Tangguh Bahari, Jakarta

Jan 2017 – Dec 2017

ICT Officer (Information and Communication Technology)

- Ensure the stability and functionality of office IT infrastructure, including hardware, software, and automation systems.
- Oversee branch server data operations and connectivity.
- Handle user requests, diagnose, and resolve IT-related issues in a timely manner.
- Perform regular preventive maintenance and system optimization for all IT assets.
- Prepare comprehensive IT management and performance reports.
- Execute other tasks or projects as assigned by superiors, in alignment with operational objectives and IT service standards.

PT. Diners Jaya Indonesia INT'L, Jakarta

Jun 2014 – Nov 2016

IT Network Engineer

- Responsible for daily monitoring, reporting, and system maintenance to ensure smooth transaction operations and network stability.
- Monitoring and verifying daily reports (CM, DCP, EDC, Advisory, Reject, and Suspend Transactions).
- Processing adjustments, deposit slips, merchant payables, and e-statements.
- Performing reconciliation, authorization, and card verification activities.
- Conducting daily transaction backups, server maintenance, and data housekeeping.
- Providing 24/7 network and system support, including regular site visits and hardware checks.

EDUCATION

Gunadarma University, Jakarta

Aug 2008 – Oct 2012

Graduate of Associate Degree in Informatics

GPA of 3.17

CERTIFICATIONS

ISC2

Nov 2025

(Certified in Cybersecurity (CC))

Cisco

Nov 2025

(Cisco Certificate in Ethical Hacker)

Fortinet

Nov 2025

(Fortinet Certified Associate in Cybersecurity)

(Fortinet Certified Fundamentals in Cybersecurity)

(NSE 3 - FortiGate 7.6 Operator Self-Paced)

(NSE 2 - Technical Introduction to Cybersecurity 3.0)

(NSE 1 - Introduction to the Threat Landscape 3.0)

Security Blue Team (BTL)

Oct 2025

(Certified Introduction to OSINT)

(Certified Introduction to Threat Hunting)

(Certified Introduction to Vulnerability Management)

INE Security

Sept 2024

eCTHP (Certified Threat Hunting Profesional)

CFA International Cybersecurity Institute

May 2020

CNSS (Certified Network Security Specialist)

LANGUAGES AND SKILLS

- Bahasa - Indonesian (Native)
- English (Basic Proficiency)
- Japanese (Intermediate working Proficiency)

TECHNICAL PROFICIENCIES

Familiar with cybersecurity tools and platforms:

- Threat intelligence solutions: SOCRadar (Cyber Intelligence), Anomaly ThreatStream, FlashPoint, SOCPPrime, ReEngine, OpenCTI, Mandiant Advantage, etc.
- SIEM systems: Security Information and Event Management (SIEM), Elasticsearch, Logstash, and Kibana (ELK Stack), Splunk, LogRhythm, Chronicle, IBM QRadar, ArcSight
- Endpoint Detection and Response (EDR): Carbon Black
- Extended Detection and Response (XDR): Trend Vision One
- Vulnerability Assessment: NeXpose
- Email Security: Cisco IronPort
- Network Detection: ExtraHop
